## EDUCATION

2020 - Present

**BTech CSE Artificial Intelligence AND Machine Learning**, SHOOLINI UNIVERSITY

## PROJECTS

2022 – Present

### INVOICE MAKER

The objective of the project is to create an Invoice Maker in HTML, CSS, JavaScript and PHP. In this project, I have created a user interface to get all the details of the company including its address, GST number, location for invoice and then generate the Invoice in pdf format and save in database.

MAY 2022 – JUNE 2022

### LOW-COST IRRIGATION SYSTEM

The objective of the project is to create a Low-cost wireless irrigation system. It is IOT based irrigation system that can control various components via internet or be automatically programmed to operate from ambient condition.

## SKILLS

- Data Structures and Algorithms
- HTML, CSS, JavaScript, PHP
- C/C++, Python
- React, Bootstrap, JQuery
- MySQL
- Version Control (Git and GitHub)
